Finance & Operations: Accounts Payable Processes, Inventory & Cost Monitoring, Expense Reconciliation, Financial Record-Keeping, Internal Controls, Budgeting Support, Cost & Works Accounting, Financial Statement Analysis, Project Finance

Experience

Research Assistant

May 2025 – Present

Symbiosis School of Economics – NSE-Funded Project, Pune

- Conduct rigorous data collection, analysis, and documentation for behavioral finance research, maintaining high accuracy standards across high-volume datasets
- Coordinate with faculty and stakeholders, demonstrating clear communication and proactive problem-solving in a compliance-oriented academic environment

Operations & Cost Intern

March 2023

Spice N' Ice, Pune

- Managed inventory tracking and cost monitoring processes, ensuring accurate recording of stock movement and expense allocation across daily operations
- Built a structured framework for inventory and cost analysis to improve expense visibility, support budgeting, and strengthen internal financial controls
- Identified key cost drivers affecting pricing decisions, optimizing procurement planning and improving overall cost efficiency
- Maintained organized operational records and ensured accuracy in expense tracking and reconciliation processes in line with documentation standards

Key Projects

Project Finance & Business Strategy | Sustainable Fashion Venture

March 2026

- Built detailed cost structures including CAPEX, working capital, pricing strategy, and revenue projections; evaluated NPV, IRR, DSCR, and funding mix (loans, equity, government subsidies)

Credit & Operational Risk Analysis | Risk Assessment, Compliance

March 2026

- Evaluated credit risk frameworks (PD, LGD, EAD) and developed Key Risk Indicators for proactive operational risk monitoring; aligned findings with compliance and control requirements

Behavioral Finance Portfolio Planning | Client Advisory

March 2026

- Designed comprehensive investment plan with layered asset allocation aligned to client financial goals, risk constraints, and long-term scalability using Behavioral Portfolio Theory

Risk Modeling & Portfolio Analysis | VaR, Stress Testing

Jan 2026

- Developed Value at Risk models (Historical, Monte Carlo, Delta-Normal); conducted stress testing and backtesting to quantify portfolio risk under adverse market conditions
